

### REMARKS

Claims 1-41 were originally presented in the present application. All of those claims were rejected under the judicially created doctrine of obvious-type double patenting. A Terminal Disclaimer is being filed herewith disclaiming the terminal part of any patent granted on the present application which would extend beyond the expiration date of U.S. Patent No. 6,519, 857 which patent formed the basis for the rejection. Accordingly, the basis for the outstanding rejection has been obviated and Claims 1-41 are now in condition for allowance.

In addition to the above, new Claims 42-59 have been added to the application. New Claims 42-53 all depend from claims which, with the filing of the Terminal Disclaimer, should be allowed. Those claims particularly recite the irregular surface of the channel wall in the housing of the cutting head which provides for an increased coefficient of friction to inhibit inadvertent withdrawal of the line from the channel during use. New Claim 54 is an independent claim which is similar to Claim 1 but does not specifically recite the pivotal mounting of the engagement cam on a post. Otherwise, new Claim 54 recites all of the limitations of Claim 1 and adds thereto the irregular surface of the support wall. Accordingly, new Claim 54 should also be allowed. Newly added Claims 55-59 are dependent on new Claim 54 and add thereto the stop recited in original Claim 2 and more specifically define the irregular channel wall.

As all of the new claims continue to recite the patentable subject matter set forth in the claims as originally filed (with the addition of the Terminal Disclaimer), it is respectfully submitted that all of the claims should now be allowed and the application passed to issue.

Respectfully submitted,

HOLLAND & KNIGHT LLP
